Diverticular Disease: A Fresh Approach to a Neglected Disease

September 2 – 3, 2011
Guerzenich Congress Center
Cologne, Germany
CME credits for the Falk Symposium 178 have been applied for at the European Union of Medical Specialists (UEMS) – European Board of Gastroenterology (EBG). The number of credits awarded will be printed in the final program.
As our populations age the prevalence of colonic diverticulosis and the complications of diverticular disease are steadily increasing. Although diagnosis is relatively straightforward the number of randomised controlled trials of clinical management are scarce and management follows tradition rather than principles of evidence based medicine. Much needs to be learnt. The symposium aim is to review current scientific knowledge and its application to clinical practice. We will adopt a critical interdisciplinary approach including epidemiology, anatomy, pathology, gastroenterology and surgery and identify the key challenges, both research and clinical, for the future.

Thanks to the generous support of the Falk Foundation it was possible to gather an international group of speakers and chairpersons experienced and involved in research of diverticular disease. We would like to invite you to be stimulated by the scientific sessions which will allow you to interact in with professional colleagues with widely differing perspectives but a common interest in diverticular disease. We also hope you will enjoy the attractions of the traditional and modern city of Cologne along the River Rhine and look forward to greeting you there.

**Poster Session**

Posters will be exhibited on September 2–3, 2011, at the Guerzenich Congress Center. The authors will be in attendance during coffee and lunch breaks on both days.

**Call for posters**

Please submit your poster abstract before **May 31, 2011**. Only one-page abstracts not exceeding 250 words, written in English and saved in Microsoft Word format will be accepted.

Abstracts must be submitted via our Internet Abstract Submission System (http://www.falkfoundation.com/poster) where further information regarding the submission format and the submission process is available.

The abstracts will be selected by the scientific organizers, preference being given to those thematically related to one of the sessions of the program.

The accepted abstracts will be printed and distributed to the participants of the congress together with the documents of the meeting.

The authors will receive notification about acceptance and further instructions in **June 2011**.

Contact address for further information on the poster session:
